SUMMARY

Software Developer — Software Engineer skilled in Java, Spring Boot, Angular, SQL and Python with hands-on experience in building scalable web applications, RESTful APIs and data-driven backend systems.

EDUCATION

Sri Sai Ram Institute of Technology, Chennai

Oct 2022 – Apr 2026

B.E in Computer Science and Engineering

CGPA: 8.58

AKT Academy MHSS, Kallakurichi

2022

HSC (12th Grade)

89%

EXPERIENCE

System Engineer — Tata Consultancy Services (TCS)

Jun 2026 – Present

- Participated in Initial Learning Program (ILP) training focused on Java Full Stack Development and enterprise application development.
- Built a full-stack project named **Invictus**, a platform that connects players, brands, and Influencers to organize tournaments, run brand campaigns, and monetize promotional activities.
- Developed scalable backend services using Java and Spring Boot, responsive user interfaces using Angular, and managed data using PostgreSQL.

Python Developer Intern — Robokidy Innovative Centre

Jun 2025 – Jul 2025

- Developed reusable UI components using Python and Tkinter, contributing to desktop applications used by internal teams.
- Worked with event-driven programming concepts to build interactive interfaces and improve user experience.
- Assisted in debugging and refining existing codebases, improving application stability and usability.

PROJECTS

ATM Security Enhancement System (Academic Project)

Python, CNN, SSD-ResNet10, Twilio

Engineered a real-time ATM security pipeline for face detection, identity verification, and mask compliance, achieving 94.2% identity accuracy and 90.1% mask detection while processing live video at 0.31s per frame with automated alerts triggered within 2.4 seconds.

UBISMashers — Sports Court Management SaaS

React, MongoDB, Render, Vercel

Designed and deployed a production SaaS platform used by a 40-member sports club in Singapore to manage bookings, attendance, expense sharing, and tournament operations, with automated match scheduling and court allocation for round robin and knockout formats, along with balance calculations and payment tracking, eliminating manual bookkeeping and improving operational efficiency. ubismashers.team

SKILLS

Languages

Java, Python, SQL

Web Technologies

HTML, JavaScript, CSS

Frameworks

Spring Boot, Angular

Databases

MongoDB, MySQL

Deployment and Tools

Git, GitHub, Vercel, Render

Soft Skills

Problem Solving, Analytical Thinking, Adaptability

ACHIEVEMENTS & LEADERSHIP

- Earned Wipro TalentNext Java Full-Stack Developer certification, covering Java, RESTful APIs, SQL, and modern front-end technologies
- Participated in national-level hackathons, building multiple full-stack and AI-based prototypes.
- Led the Talent Elevation Group, organizing coding challenges and mentoring high-performing student developers.
- Received **TCS Gems Appreciation** for developing and effectively presenting the **Invictus** full-stack application, recognized for its innovation and business impact during ILP training.
